Gaurav Porwal

Principal Technical Consultant

Bengaluru, Karnataka, India

+919066641535

porwalgaurav14@gmail.com

Proven Technology Leader experienced in driving innovation and digital transformation across diverse domains, including **banking & finance**, **inventory management**, **food services**, and **industrial manufacturing**.

Led and Mentored teams of 50+ engineers designing and implementing **distributed systems**, **microservices architectures**, and **API-driven solutions** for **SaaS and enterprise platforms.**

Strong Client Engagement background, collaborating with leading organizations to help determine their business requirements, offer appropriate solutions-to-problem , and drive measurable ROI.

Skills

Leadership & Management

Team Building, Technical Consultancy, Agile Methodologies, Jira

Enterprise Architecture & Design Patterns

Microservices, Serverless Architecture, Agile & Waterfall Methodologies, API Management & Integration

Frontend Technologies

ReactJS, NextJS, HTML/JS/CSS

Backend Technologies

NodeJS, RESTful APIs, SQL/NoSQL Database, Python

Mobile Technology

React Native

Cloud & DevOps

AWS, CI/CD Pipelines, Docker, Kubernetes

Certifications

Ultimate AWS Certified Solutions Architect Associate SAA-C03
Udemy

Agile and Scrum Master Certificate
LinkedIn

Education

Visvesvaraya Technological University (VTU)
Computer Science
8.87
B.E

Experience

GeekyAnts Pvt Ltd — **December 2024 – Present**
Principal Technical Consultant — Bengaluru, Karnataka

- **Account Growth & Tech Strategy :** Translate business objectives into **scalable technical architectures**, identify **new opportunities** and **strengthen client relationship**.
- **Technical Leadership**: Design resilient, cloud-native architectures, leveraging expertise in **Node.js**, **React**, and **cloud platforms** (AWS, Azure).
- **Project Oversight & Delivery**: Govern **coding guidelines,** standardized boilerplates and coding conventions, expediting project setup and maintaining **consistent code quality**.
- **Innovation Technology** : Conduct in-house seminars and proof-of-concept demos that drive adoption of emerging technologies like **AI agent, Model context Protocol**,, and **LLM frameworks** (OpenAI).
- **Key Projects & Tech Stack**
  - **Designs and leads** the end-to-end system that enables onboarding a **new client** by simply **submitting a form** — **automatically deploying** apps, infrastructure, branding, and rules in the cloud without manual
  - **Ensures configurations, rules, secrets, and environment files (.env) are safely stored, encrypted, and versioned** — even rollback

GeekyAnts Pvt Ltd — **May 2021 – November 2024**
Associate Director of Engineering — Bengaluru, karnataka

- **Operations & Delivery**: Streamlined communication between business teams and engineering to define clear technical requirements, project scopes, SOW, and deliverables
- **Scalable System Design**: Unified architectural standards—encompassing **microservices**, containerization, and **CI/CD** pipelines—to ensure rapid deployments and minimal operational overhead.
- **Mentorship & Resource Optimization:** Facilitated workshops and strategically aligned resources to accelerate project timelines and ensure skill optimization.
- **Key Projects & Tech Stack**
  - **Inventory Management SaaS**: Guided a cross-functional team using **React**, **Node.js**, and **PostgreSQL** to build a real-time stock tracking platform with advanced reporting dashboards.
  - **Enterprise Messaging Upgrade**: Revamped a large-scale notification service leveraging **Docker**, **Kafka**, and **Kubernetes**, achieving near-instant messaging for thousands of concurrent users.

GeekyAnts Pvt Ltd — **June 2019 – July 2021**
Engineering Manager — Bengaluru, Karnata

- **Team Oversight & Growth**: Directed a cross-functional team of 30+ engineers (frontend, backend), strengthening collaboration and aligning skill sets with evolving project demands.
- **Project Delivery**: Breakdown the project plan into milestone, Established consistent release schedules, milestone checkpoints, and risk assessment protocols across multiple engagements to ensure on-time delivery and stable production environments.
- **Technical Enablement**: Introduced early-stage code reviews and continuous integration pipelines to reduce defect inflow and maintain high engineering quality.
- **Client-Focused Innovations**: Spearheaded large-scale projects, such as a healthcare management platform that streamlined patient data handling by 40%, and a global consumer marketplace solution that expanded client reach into new markets.
- **Mentorship & Succession Planning**: Developed leadership capabilities among senior developers, promoting a culture of knowledge-sharing through regular workshops, technical deep dives, and pair-programming sessions.
- **Cross-Functional Collaboration**: Worked closely with design, product management, and DevOps teams to refine project scope, prioritize features, and uphold product standards in fast-paced, agile environments.

GeekyAnts Pvt Ltd — **May 20216 - June 2019**
Software Engineer — Bengaluru

- Design easy user interfaces and great user experiences for digital platforms

- Web app which help managing the inventory by creating multiple folders and uploading different items using ReactJS

- Worked at the client location and developed Lens Ordering e-commerce web app where user can order a lens and filter it using various parameters.

- Integrate external services such as payment services, order tracking, push notification, video/chat service, CMS, web-socket, Support ticketing system

Projects

Financial Services

- **Architected** and **implemented** financial bank account opening app for the **US region**
- Engineered a dynamic, multi-institution bank account opening platform enabling custom workflows and forms based on each bank's compliance needs.
- Processed and **automated large account opening** application using AWS Services, integrated Core banking APIs, Persona for KYC, OFAC/AML checks, secure data encryption adhering to FFIEC standards
- Led a **10-member cross-functional** team (developers, QA, DevOps, and business analysts) to deliver a robust B2B banking platform with near real-time data sync.

Configurable flows, NextJS, NestJS, AWS, K8, Notification

Modular & Interactive Data-Analysis Dashboard

- Developed a **React.js**-based **dynamic dashboard** to help **manufacturing stakeholders** easily visualize, track, and analyze production data from various lines and facilities.
- **Design System Integration** to ensuring consistent visuals, typography, and color schemes
- **Dynamic Widgets & Modules**: Created reusable components (e.g., charts, tables, status indicators) that adapt to API data in real time, providing immediate insights into machine performance and outputs.

design-system, dynamic-widgets, dynamic-forms, reactjs

Vue Native

- Develop and maintain an **open-source** framework that enables developers to build **mobile applications** using the **Vue.js** syntax on top of **React Native**.
- Designed and implemented key modules to bridge **Vue.js reactivity** with the **React Native** rendering engine, delivering a seamless experience for developers familiar with the Vue ecosystem.

vue-native, React Native

Sorty
https://app.sortly.com/

- Web app which help managing the **inventory** by creating multiple **folders and uploading** different items.
- Real time data integration, **dynamic form builder**, along with the QR code scan
- My Role include **project owner** and **team lead** along with developing core functionality of the app.
- Also coordinating and managing the work with client engineering team.
- Developed core functionality such as dynamic form and Attribute, searching using **elastic search**, handling tree like folder and search & filtering
- Handle the **bulk** update/ delete, imports or export of the inventory items

ReactJS, Sentry, Redux, Styled-Components

B2B Eyewear Ordering System

- Developed a B2B eyewear ordering SPA using React.js for ordering the bulk lens
- Enabled **offline capabilities** and faster data retrieval by caching using **IndexedDB**
- Enabled **multi-theme** support and reduced **per-client configuration time** by **40%** through automated **Webpack bundling**, which dynamically swaps component and themes at **build time**.
- **WebSocket Integration**: Provided **real-time** lens or frame tracing capabilities
- REST-Based API Integrations supporting **product** and **user** management, and **order tracking**.

ReactJs, JWT-based, i18n Localization, Mobx
